

## SALES NOTES

SHELBYVILLE

*It's Peach and Apple pickin' time*

Now is the time to show the Oliver No. 345 Fork Lift Carrier to your orchard and truck garden farmers. You will be surprised at the number of farmers still lifting and carrying baskets and crates.

The No. 345 is designed to carry a balanced load of up to 1300 lbs. and is adjustable to "ground level lift" or "high lift". The fork width is adjustable since wooden pallets are commonly used in material handling. A metal platform is available as optional equipment.

Successful dealers use low-cost tools as leaders for future sales. We suggest that you use the No. 345 Fork Lift Carrier as your leader as it will also fit most competitive three-point hitch tractors.
