550 UTILITY TRACTOR

The Oliver 550 is an outstanding performer in the utility tractor class. It is truly an all-purpose machine. It has many features which make it an important member of the Oliver team. It has more power, more weight and more built-in features than any other tractor of comparable size. The 550 is a tractor you can use anywhere, on any kind of job with any type attachment.

A maneuverable and compact tractor, it is built to the size that enables it to work in close quarters and perform many tasks formerly done by hand. The 550 is convenient and easy to handle, yet it is built to withstand prolonged, heavy-duty service.

At first glance, you know the 550 is in the same family of Oliver tractors as the 1800 and 1900. The new grille gives that massive, sturdy look so well accepted in the other two. The 550 has real eye appeal.
