BREAKDOWN I-D

*Hood Center Bar Hinge*

A number of requests have been received for the hood center bar hinge that is spot welded to the hood and to the radiator shell on Super 55 tractors from tractor serial number 6 000-518 to 11 886-518.

To fill these requests, this hinge is now available in small quantities under part number 1ES-809. The hinge is the same as used on these early production tractors so it will have to be either welded or riveted to the hood depending on the facilities available.
