OTHER TRIUMPH EQUIPMENT

SAFEWAY RAMP TRAILER

In two minutes your SCM unit is loaded or unloaded without the aid of planks, blocking, docks, ditches or banks. Folding, self-blocking ramps effectively stop movement of trailer during both operations — secure tractor in place during transport. The adjustable width of Safeway Ramp Trailers makes it possible to set the guide rails to fit the tractor. Safe in loading . . . Safe in Transport.

HYDRO-TRIMMER

Another Triumph tool for speeding up mowing on FAI Highways is the Hydro-Trimmer, designed to eliminate hand trimming around delineator posts, trees, shrubs, etc. It cuts three sides of obstructions without raising or lowering. The Hydro-Trimmer is available as an attachment to the Hydro-Clipper in place of the sicklebar. This unit will not throw cans, bottles, etc. because of its unique design.
